INTRODUCTION

Let's face it, we all want more traffic, more subscribers and more daily sales. And there's one simple solution that still works like gangbusters for this — eBooks.

Whether it's a powerful lead magnet such as a free report or whitepaper, or a Kindle book that you sell daily... digital books are still an awesome way to attract traffic and sales for almost any type of business.

But there's just one problem — creating them can cause all kinds of headaches. Writing, formatting, designing... it can take days or even weeks to create an eBook, plus a steep learning curve and a handful of expensive tools you'll need to master... before you've even hit publish!

But there's a brand-new tool on the market that promises to change all that.

It's called **Sqribble**.

WHAT IS SQRIBBLE?

Sqribble is a cloud-based tool that allows you to create eBooks (reports, whitepapers, etc.) in seconds. It uses ready—made templates and drag n' drop design features that make self-publishing your eBooks a breeze.

It's packed with professional templates, seriously good looking covers, and surprisingly, is totally bug free. In fact, the whole process of creating an eBook with Sqribble is satisfyingly easy and smooth

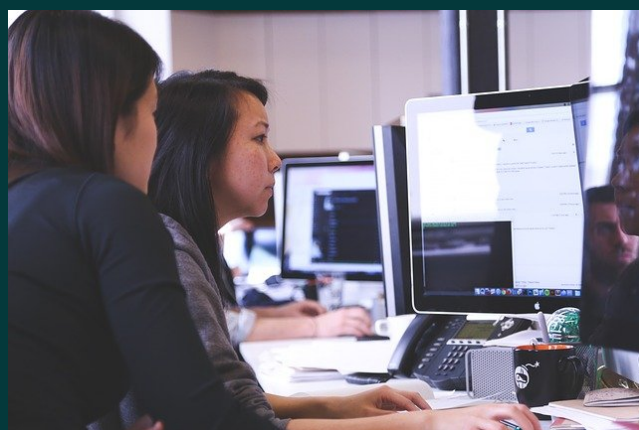

But perhaps most remarkable of all... Sqribble comes loaded with some of the most powerful features I've seen in an eBook creator tool.

HOW DOES IT WORK?

When you log into Sqribble, you'll see a bunch of eBook templates to choose from. These are all based on different categories, so you'll need to find one that matches your market/topic/niche.

Once you've selected the template you want to use, you simply click "view" to see how your eBook will look (don't worry, we'll add your content next.)

In this view screen, you can see how the book will be laid out and get a feel for the style. If you don't like it, you can always go back and choose another template

(there's 50 templates to choose from, and you can also edit the templates too, in all kinds of ways.)

TAKING A CLOSER LOOK

You'll notice that the layouts and designs are very slick. They look like professional publications!

Next, you'll be asked where you want to source your content for the book. You can choose:

- Grab from a URL
- Start from scratch
- Copy and paste manually
- Upload Word File
- Start from Article Collection

Let's Take A Closer Look At These Options

— **Grab from a URL**

OPTIONS

This allows you to insert any URL you want, and **Scribble** will automatically pull the content from that page and insert into your book. It strips the html code and only inserts the text from the page.

This is my favorite method, because it saves a ton of time, and allows you to use expert content (with credits) so you can target topics and niches you're not an expert in!

— Start from scratch

As it sounds, this option allows you to enter your content like you'd enter it into a Word document. You just type straight into the page.

— Copy and paste manually

OPTIONS

This allows you to copy content from anywhere you want, and paste into the book, where the book will format and lay it out for you professionally.

— Upload Word File

You can get Scribble to pull your content straight from a Word document, stripping out any code or weird formatting.

— Start from Article Collection

Here you can extract content from **Scribble**'s huge library of private label articles which you can use for free, without crediting authors or linking to the source. It's another great way to quickly fill your book with content, for free!

Finally, you'll move to an editing screen, where you can resize text, move content around, edit text directly, add media, links, lists, call to action areas, new pages, and a whole bunch of other options for customizing the look and feel of individual pages or the entire book.

WHAT IT CAN DO

You can even add new pages that use a totally different layout to the rest of your book, giving you a huge amount of flexibility and endless options for your book.

While editing, another thing I really liked was the Themes option. With a single click, you can instantly change the color theme and font style of your entire book. It's like giving your book a new "skin" and it's just one more feature that sets Scribble apart from the other tools out there.

Finally, when you're ready to publish, you hit the little "Generate eBook" button in the top right corner of the screen and voila, your book is now ready!

SQRIBBLE RIGHT FOR YOU?

If you're already creating lead magnets or eBooks for sale, then I have no doubt that **Scribble** is going to save you hours of work and tons of money on freelancers (if you outsource the design or writing side of it.)

For that reason, I truly believe that Scribble is well worth the investment and perfectly suited for most small to medium size businesses, especially self-publishers and info marketers.

It's also a great tool to use if you're a freelancer or agency, working with clients to create professional eBooks

(includes commercial rights, plus a done for you agency website, which is a big bonus!). You could easily charge \$100's for this service, and with Scribble, you could get the work done in way less time than it wouldn't normally take you.

WHO IS THIS FOR?

Scribble is most suited for freelancers, independent internet marketers, small marketing agencies and small business

owners who want to create lead magnets,

publish Kindle books, create and sell eBooks, or publish whitepapers.

If you're also looking to create an additional income you'll be pleased to know that also included is a commercial agency license to use Scribble for client work, offering eBook creation services, with the ability to create unlimited eBooks which you can sell and keep all the profits!

THIS IS PERFECT FOR?

- Product Creators
- List Building
- Bloggers
- Digital Marketers
- Entrepreneurs
- Facebook Ads
- Authors
- Consultants
- Teachers
- Coaches & More

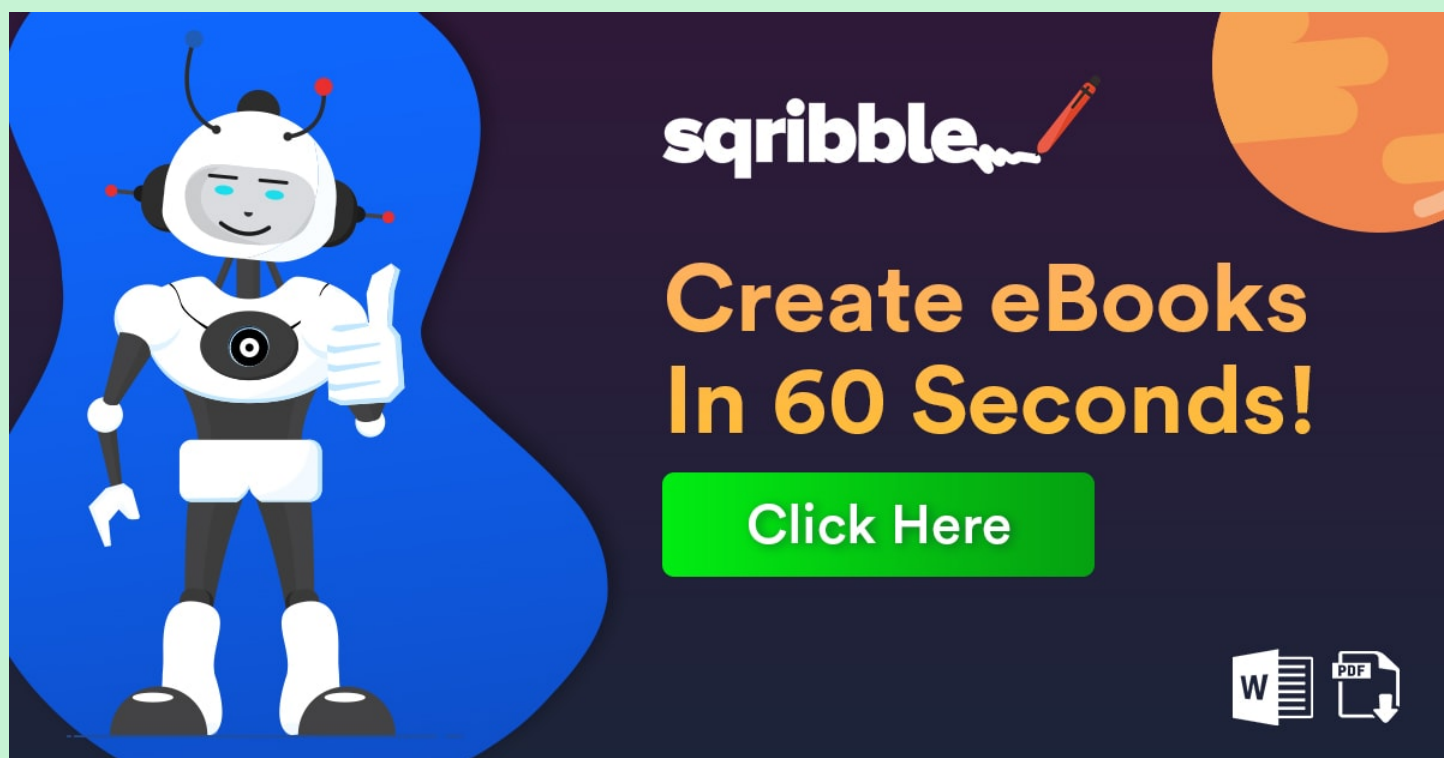

Scribble has a ready built agency website with pre-filled portfolio that you can upload to any domain for instant authority, so that you can show it off to any new potential clients to get work. (Professional websites like this would cost you at least \$600 alone, so it's really good value.)

THE CREATOR OF SQRIBBLE

Sqribble has been developed by Adeel Chowdhry, who is a well-known internet entrepreneur and best seller, with over ten years of experience and has previously created worldwide hits such as Pixel Studio FX which sold tens of thousands of units all around the world.

He's known for creating high quality professional solutions and I expect no less from **Sqribble**.

The advertisement features a white robot character with a large eye and antennae, standing on the left. The background is dark blue with a large orange circle on the right. The text 'sqribble' is written in white with a red pencil icon. Below it, the text 'Create eBooks In 60 Seconds!' is written in large orange letters. A green button with the text 'Click Here' is positioned below the text. In the bottom right corner, there are icons for a Word document and a PDF file.

CONCLUSION

The standard has risen online. These days, your eBooks can't look like crap, or people just won't want to optin, buy or read it. And because people are busier than ever, they will only spend a couple of seconds deciding whether your book is worth reading or not.

With **Sqribble**, you can instantly create books that scream trust, credibility and value, and attract more subscribers and sales.

Creating eBooks has always been a pain for most marketers, but with Sqribble, it really doesn't have to be. With a few clicks, you can choose a template, add content, tweak the layout and then publish online... in just minutes from now.

Instead of spending hundreds — or even thousands — on freelancers, or even more money on fancy software, I would seriously recommend giving Sqribble a test drive first... I think you'll be amazed how powerful, easy and quick the whole experience is.
